Full Stack Developer & Team Lead with 6+ years of experience. Expert in React, Node.js, and Frontend Architecture. Proven ability to deliver high-value Enterprise systems (10M+ THB) and launch successful SaaS products from scratch.

Technical Proficiency

Front-End: React, Next.js, Typescript, SASS, Tailwind, Mui, Antdesign, Shadcn

Back-End & Database: Node.js, Express, PHP, Python, Prisma, PostgreSQL, MongoDB

Tools & Utilities: Webpack, Babel, Docker, Git, Jira

Experience

Hybiot Co., Ltd. — Team Lead & Front-End Developer

March 2023 - July 2025

- Lead the end-to-end frontend architecture for an Enterprise Security System (valued at 10M+ THB) from scratch to production, successfully deploying solutions for major government agencies (e.g., CIB, NHA, GSB, Highway Police).
- Engineered complex UI modules involving low-latency video streaming (Live/Playback), an automation rules engine, interactive map visualizations for device placement, and a granular RBAC system handling 100+ permission levels.
- Directed frontend quality across the company (3 squads, 6 developers) by establishing strict code review standards and mentorship programs, ensuring code consistency and maintainability.

Pramool Quick — Founder & Full Stack Developer

January 2020 - Present

- Bootstrapped a B2C Real Estate SaaS ecosystem (Web & Chrome Extension) serving 400+ users.
- Developed a robust scraping engine processing 300,000+ property listings monthly (150k per batch), utilizing advanced filtering and automation.
- Reduced user workflow time by 95% (from 2 days to ~1 hour per week) by automating property search, aggregation, and analysis.

Mubaza — Co-founded & Frontend Developer

December 2014 - September 2016

- Co-founded a Tech Startup and built an E-Commerce platform featuring a custom interactive clothing design tool for multiple sellers.

Key Projects & Contracts

Summer Car Rent — Full Stack Developer (Contract)

Oct 2025 - Present

- Developing a centralized Car Rental Platform to replace fragmented workflows (Paper contracts, Excel, LINE), designed to reduce manual workload.

Banphue Salt — Full Stack Developer (Contract)

Aug 2025 - October 2025

- Built a custom POS & Weighing System that reduced monthly accounting reconciliation time by 90% (1-2 days to 1 hour) and mitigated fraud risk by 80%.

Education

Walailak University

Nakhon Si Thammarat

Bachelor of Science in Information Technology

March 2014
